

A scatter plot showing the normalized error (Y-axis, ranging from 4 to 18) versus the number of iterations (X-axis, ranging from 0 to 10). The plot compares two methods: the proposed method (blue circles) and the method in [10] (red circles). The proposed method shows significantly lower error across all iterations compared to the method in [10].

Iteration	Proposed Method (Blue)	Method in [10] (Red)
0	~6.5	~6.5
